Do not write as if this is a report on what you have done. Next will be the Introduction. Here you will introduce the reader to the topic of your research. The next will be the Body of the Paper. This will not be identified or titled as such because you are beginning to discuss the research of your topic. Be sure to include your research citations and follow the MLA guidelines. The next titled section will be the Conclusion/Summary, here you will summarize or conclude your research topic. This should be close to what your Abstract describes about your researched topic. Next will be the section identified as Suggestions for Further Research. Simply identify areas for additional or continued research for your particular subject. This does not need to be too in depth but remember, this is where you will start your next paper for the next FSM class. The final section is your Reference Page.
